

# AH!

## Cables and Interconnects

***Hand Made High Quality Cables, Don't be put off by the low price!***

AH! Of Holland (pron Ah-ha!) have an award winning range of products including the 'Njoe Tjoeb' CD player, the 'Tjoeb 66' amplifier and a range of cables for hi fi.

All AH! Cables are hand made using their own designed high quality cables made from the best materials chosen for their sonic purity. Icon have tested these cables in all kinds of domestic and exhibition situations and always found them to perform superbly. We find the speaker cables especially good, having a musical, relaxed sound whilst being revealing, as are the 'Bullet plug' phono interconnects.

### **What AH! Say:**

"There are many different interconnects and mains cables on the market, but we at AH! believe we can do at least as good as other manufacturers and certainly at a better price. All our products are designed and tested in Eindhoven and manufactured in Europe.

We use the best designs, the best carefully researched materials and our products are carefully auditioned over a long period of time to ensure the best sonic performance with all kinds of hi fi equipment.

### **In the beginning:**

After a bad experience where a CD-player customer was unhappy with the sound due to him using the supplied cheap interconnect, and solving the problem by supplying a good quality cable, we decided to investigate the manufacture of our own cables.

We had previously had lots of experience with manufacturing audio-cables. So we gave things like to design and materials much thought and listening tests.

The choice of material is very important, (e.g. not all silver is the same) and the manufacturing spec was developed in close cooperation with a Swiss manufacturer of pure-metal wires. Gold, silver, copper, aluminium, brass, copper, titanium, platinum and other materials became available for experimenting.

Eventually we found a talented Swiss engineer, who was able to construct the cables for us at a very affordable price.

The Swiss AH! cable is supplied in bulk and built in Holland by Mr. Koos Boshoven (KB) who is responsible for this project. High quality solder (3% silver) is used for all connections, audiophile connectors (Bullet, Neutrik) are used where possible. Don't be surprised to get a full completed AH! cable where other brands will not even supply you the plugs for the same price! AH! cables are excellent value for money."

### **DE MAT**

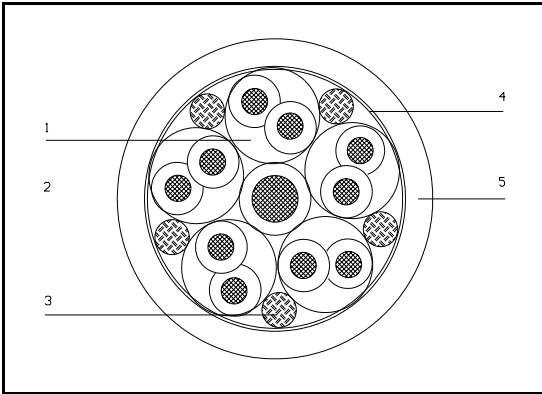

Probably the most significant improvement you can make to any CD player. Highly praised in several reviews of the Njoe Tjoeb.

Now available on its own. De Mat stabilises the rotation by adding mass and absorbing vibration. Its mat black colour absorbs stray laser light. A bargain at only £13.95. Fits most mechanisms, but unsuitable for some slimline models.

## AC DIREKT KB 10 MAINS CABLE

1. 5 pairs fine copper strands 0.5 mm<sup>2</sup>; each strand 28x 0.15 mm; highly flexible polyethylene isolation.
2. 1 fine copper centre strand 1.5 mm<sup>2</sup>; 80 x 0.15 mm; highly flexible polyethylene isolation.
3. Strings of fill material.
4. Thin textile foil cover.
5. PVC outer tube.

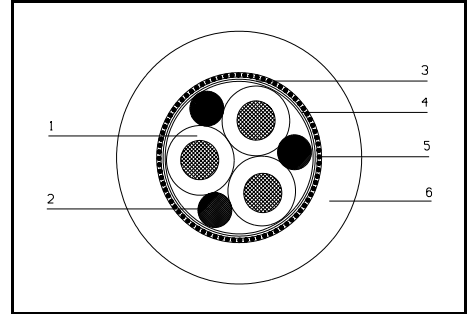

This high current ac-cable has a complex weave. Supplied with a high-quality UK 13amp plug, and a hospital grade (the best) IEC connector, with extra shrink tube protection. Using these cables can bring improvements across all frequencies: deeper, tighter more rhythm. Voices and instruments getting the correct dimensions. Replacing the standard ac-cables one-by-one in your system proves very easily the cumulative effect of what these cables do for your system.

### AC DIREKT KB 10 MAINS CABLE PRICES:

10mm 13a plug to IEC 1.0m	£69.95
10mm 13a plug to IEC 1.5m	£97.95
10mm 13a plug to IEC 2.0m	£122.95
Other lengths on request.	

## AS DIREKT KB 8 PHONO CABLE

1. 3 fine copper strands 0.5 mm<sup>2</sup>; each strand 16x 0.20 mm; highly flexible polyethylene isolation.
2. Strands of fill material.
3. Polyester foil cover.
4. Aluminium foil cover.
5. Tinned copper screen.
6. PVC outer tube.
7. Plus 'Bullet' phono plugs

Using the new highly praised 'Bullet' Plugs which give a much better connection, and our own special formula for the co-ax cable. Superb musical sound across the whole frequency range with a silky and yet transparent top end. This cable has quite a long burn in time!!!

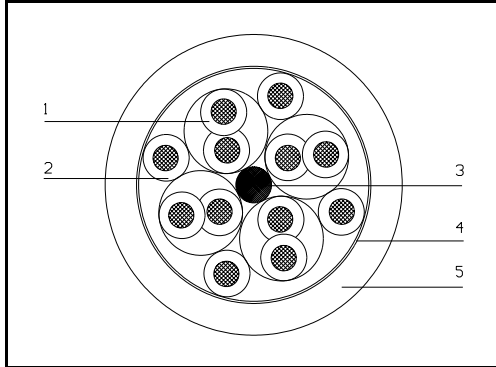

### KB8 PHONO INTERCONNECT PRICES (Pairs)

RCA PHONO-RCA PHONO 0.8m	£69.95
RCA PHONO-RCA PHONO 1.2m	£79.95
Other lengths on request.	

## LOUDSPEAKER DIREKT KB 8

1. 4 pairs fine copper strands 2 x 0.25 mm<sup>2</sup>; each strand 14 x 0.15 mm; highly flexible polyethylene isolation.
2. 4 single fine copper strands 0.25 mm<sup>2</sup>; 14 x 0.15 mm; highly flexible polyethylene isolation.
3. Polyethylene centre fill.
4. Thin textile foil cover.
5. PVC outer tube.

shown here with banana and spade terminals

These cables were developed to work well with our ac-cables and interconnects. They need a fairly long run in time, but then they will reveal a surprising high-end quality like the other AH! cables. The same resolution, speed and authority. Also the sss's and ttt's, so abundant available in female voices are NOT highlighted, make this cable a joy to use. A full AH! cabled system will take the listener more into the music, at low and high volume levels.

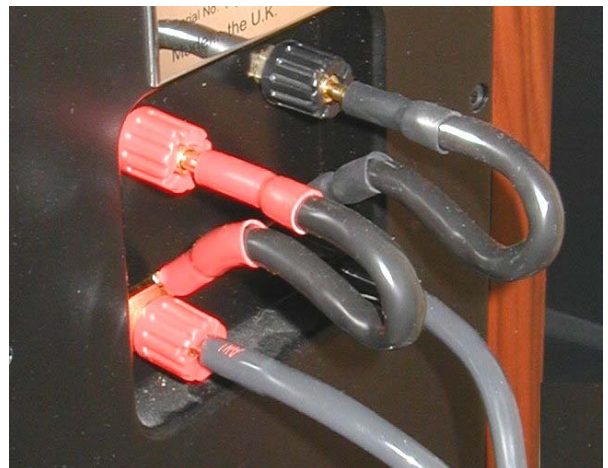

Supplied using banana, spade or both connections. The cable-ends have cable-boots with extra long legs so you have maximum possibilities for your connections. A small AH! logo indicates the + leg of the speaker cable.

### KB8 LOUDSPEAKER CABLES (pairs)

Available in Banana to Banana  
Banana to Spade terminal  
Spade to Spade  
(All at the same price)

LS Direkt KB8	2.5m pr	£79.95
LS Direkt KB8	3.0m pr	£89.95

LS Direkt KB8	10.0m pr	£224.95

LS Direkt KB8 Jumper set  
To replace Bi-wiring metal strips

LS Direkt KB8 . (B/B S/B S/S) £49.95

## AS DIREKT KB 8 XLR BALANCED

This cable is the same as the one used for our single-ended interconnect. With very high quality XLR connectors.

### KB8 BALANCED XLR PRICES: (Pairs)

Neutrik XLR-Neutrik XLR 0.8m	£69.95
Neutrik XLR-Neutrik XLR 1.2m	£79.95

## NEW! DOUBLE CONDUCTOR KB8

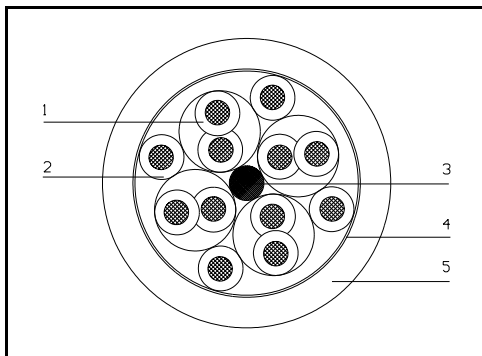

Developed with 'high end' equipment in mind, these feature a separate cable for the 'live' and 'common' conductors with even lower resistance, inductance etc reducing cable restriction even further allowing your amplifier/speaker combination to 'breathe' a little more and develop the full potential of your hi fi.

LS DS KB8	2.5m pr	£124.95
LS DS KB8	3.0m pr	£139.95
LS DS KB8	3.5m pr	£164.95
LS DS KB8	4.0m pr	£184.95
LS DS KB8	5.0m pr	£219.95

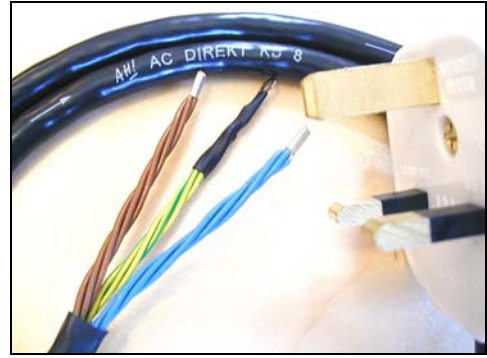

Other lengths on request

## AC DIREKT KB 8 MAINS CABLE For NJOE TJOEB CD PLAYER

1. 4 pairs fine copper strands 2 x 0.25 mm<sup>2</sup>; each strand 14 x 0.15 mm; highly flexible polyethylene isolation.
2. 4 single fine copper strands 0.25 mm<sup>2</sup>; 14 x 0.15 mm; highly flexible polyethylene isolation.
3. Polyethylene centre fill.
4. Thin textile foil cover.
5. PVC outer tube.

This HARD WIRED mains cable is also ideal for other low powered equipment. Promotes a cleaner image and individual instruments instead of the general muddling of sound that can sometimes happen. One end of the cable has a high quality UK 13A pre fitted plug, and the other side is pre-fabricated for a fast mounting in your equipment. Standard length is 1,50 meter.

KB 8 AC cable for Njoe Tjoeb 1.5m £52.95

***We guarantee that these cables will improve the performance of your system!***

*In the unlikely event that you are not delighted, return them to us and we will refund the purchase price.*

*(10% handling charge, excluding special orders).*
